

Post-Master Accountancy

Check out the
website for **more**
information

English

You want to become a **Registered Accountant (RA)** and you are looking for a solid Accountancy program at a renowned university. A program that covers the **latest developments** in the field and has lecturers with **cutting-edge knowledge** from practice and theory. An environment in which you **build a network** of talented young professionals that offer insights from their own international experiences. A Post-Master's program that allows you to **combine work and study**, with classes on Fridays, that provides you with the knowledge and skills you need to **take the next step** in your career.

This is why you choose Tilburg University:

- A 2,5-year English taught program in the Netherlands that starts in March of each year, with classes on Fridays.
- The Post-Master offers an innovative curriculum. A thorough program that provides a solid base for life-long learning as an accountant.
- High-quality faculty that mainly consists of professors and experienced practitioners. They combine their personal experience in the field with a passion for education. A combination that translates into interesting and relevant classes.
- A program with ample attention to large recurring themes on top of the three core courses (Financial Reporting & Financial Reporting Law, Auditing & Assurance, and Internal Control & Accounting Information Systems), including ethics, data analysis, and sustainability.
- Society is changing and with it the work of financial auditors. We therefore discuss special topics such as internal and operational auditing, governmental accounting, and the accountant as a financial professional.

- Theory and practice are well-integrated. For example, you can complete your internal control case as part of the Post-Master's program. This saves you time and expenses because the case also counts for the practical part of the RA program and is included in the tuition fee of the Post-Master at Tilburg University.
- The program is small-scale and interactive. You will know your fellow students and lecturers well, and there is ample opportunity for personal guidance.
- It is a great contribution to your network. Since you experience the classes together with your peers, you will enrich your network and your learning experience.
- On-the-go training in English business language.

Post-Master Accountancy

During your studies, you do a three-year traineeship in an audit firm. This traineeship includes some formal coursework, half-yearly trainee reports, a term paper in which you describe a dilemma that you encountered in practice, an internal control case from your own practice, and a final integrated oral exam. After successfully finishing the traineeship and the Post-Master Accountancy, you become listed in the charter of the NBA, and are allowed to bear the title Registered Accountant (RA).

Program and courses

To enroll, strict **prior education requirements** apply. We set high standards for ourselves and expect the same from you. If you have any deficiencies, we offer you the opportunity to take those courses prior to or during the Post-Master through the offerings in our Bachelor's and Master's in Accountancy. A nice bonus: the deficiency courses are **included** in the tuition fee.

Introduction

Tuition fee
4.500 per year

Deficiency courses and internal control case included
